work experience

Haze Couture (Cruxnd Haze, Inc.) — Mar 2026 – Present

Head of Product and Mobile App Development Lead · Remote, US-Based

Dart · Flutter

- Head of Product for a US fashion-tech startup: I decide what the team builds next, while still engineering the Flutter app I took from handover to its App Store launch.
- Built end-to-end payment and checkout flows including Apple Pay, Google Pay, biometric payment confirmation, currency conversion notices, split shipping, and an in-chat “Pay For Me” feature.
- Hardened app reliability by implementing automatic 401 token refresh with request replay, separated staging/production Stripe environments, and authored 31 product guides plus tagged documentation (customer vs. internal) to train the support chatbot.

Alusoft Technologies Ltd — Mar 2025 – Sep 2025

Software Engineering Intern · Oyo State, Nigeria

Dart · Flutter · Node.js · SQL · PostgreSQL · Git · Express.js · JavaScript

- Collaborated in a multi-developer team to build EduTraining, a platform for student course discovery and instructor management.
- Engineered reusable Flutter UI components and backend RESTful APIs using Node.js, Express, and PostgreSQL.
- Spearheaded initial development for OtakuPlanner, driving sprint planning and peer code reviews.

projects

aLaStudie — Oct 2026

Flutter · Dart · Node.js · Express.js · PostgreSQL · Socket.IO · Bluetooth LE

- Architected a collaborative study platform enabling students to discover rooms and schedule recurring sessions.
- Engineered real-time room chat, shared task synchronisation, and synchronised focus timers using Node.js and Socket.IO.
- Implemented offline peer-to-peer study group discovery and session coordination via Bluetooth Low Energy (BLE) for low-connectivity environments.

HybStockAdvisor — Mar 2026 – Jun 2026

Flutter · Dart · Python · PostgreSQL · Git · Flask

- Architected a role-based stock investment advisor app combining financial technical indicators and NLP sentiment analysis.
- Built interactive real-time market dashboards in Flutter featuring customizable watchlists and algorithmic recommendations.
- Designed secure RESTful API integrations and data processing pipelines in Python (Flask) and PostgreSQL.

SIWES360 — Nov 2025 – Dec 2025

Flutter · Dart · Node.js · MySQL · Git · Express.js

- Developed a full-stack digital platform using Flutter, Node.js, and Express to digitise student internship logbook monitoring with supervisor review workflows and administrative audit tools for instant logs.
- Implemented role-based access control (RBAC) and JWT authentication governing 4 user tiers (Students, Supervisors, Institutions, ITF).

education

Covenant University

B.Sc. Computer Science, First Class Honours

Aug 2022 – Aug 2026

skills

programming languages

Dart · JavaScript · Python · SQL

frameworks & libraries

Flutter · Node.js · Express.js · Flask

databases & tools

PostgreSQL · MySQL · Git · REST APIs · JSON Web Tokens (JWT)

languages

French (DELF A1 & A2)

certifications

Google Flutter Programmer Certificate

Coursera

Prompt Engineering Course on Large Language Models
